

March 20,2020

At **Ikaan Villa Spa** our main priority is the health, well-being and relaxation of our guests, clients and employees.

We are aware that COVID-19 requires special care from all of us. Although, we have always had hygiene and safety protocols. Therefore, in the face of this crisis, we reviewed and ensured that our biosafety protocols meet the standards established by international health organizations.

A factor that contributes to the fight against this epidemic is avoiding agglomerations and provide clean air. Faced with this contingency, **Ikaan Villa Spa** offers an excellent alternative, since we have rooms distributed throughout our more than twenty-six hectares of meticulously maintained green areas, as our goal has always been the coexistence with nature.

At **Ikaan** we are attentive to any update regarding the health sector to always offer you the highest safety measures.

We reiterate at your command, offering our services.

**Ikaan Villa Spa.**
